

Designed by the founder of Real Tool® snow guards

● **A LIFETIME ROOF SYSTEM COMPONENT** ●

SO STRONG...SO FAST...SO COOL

**HONEST
LIFETIME
WARRANTY**

Blades **MUCH** closer to the panel helping reduce damage from icing

LIFETIME'S PATENTED ANGLED SET SCREWS HELP PREVENT PANEL DAMAGE

**Go ahead...crank it.
You ain't gonna
break it!**

Part #	Slot Size	Gauge
LT 200	.200" = 3/16"	24-30 ga.
LT 300	.300" = 5/16"	20-24 ga.

For Double Lock Standing Seam

STRONGER

Made of Almag 35, (aluminum/magnesium) a pure certified aircraft alloy that does not corrode. Its incredible elongation makes it super strong. PLUS it provides a superior substrate for coating or painting: available in Mill and Kynar® finishes, see chart.

FASTER

The Patented Angled Set Screws make the installation faster and prevent panel damage.

SQUARELOCK™

The set screw forms an I-Beam structure in the patented square pocket for incredible hold!

The SquareLock™ easily withstands more than 4150 lbs. of force (the metal roof did not fare so well)

Independent testing performed by Farabaugh Engineering and Testing, Inc.

Kynar® is the #1 choice of architects & building specifiers

The Kynar® System

Step 1

Mill Finish

Cast in certified Aluminum/Magnesium (Almag 35) for strength and elongation.

MATTE BLACK

MANSARD BROWN

HARTFORD GREEN

SLATE GRAY

Step 2

Chromate Conversion

Forms a complex molecular metal/chrome molecule for exceptional corrosion prevention and adhesion.

DEEP RED

MEDIUM BRONZE

Step 3

Kynar® Primer

Applied for the Kynar® top coat.

DARK BRONZE

FOREST GREEN

Step 4

Kynar® Finish

Oven Baked to perfection!

CHARCOAL GRAY

COLONIAL RED
