As colder weather approaches and we pull out our snow shovels, now is a great time to send out weatherizing notices and roof "tune ups" to your local homeowners. This will get your name in front of them so that when a leak arises, they know who to call!

Lifetime Tool® is introducing an Architectural Profile Snow Guard!

screws.

Good news! The wait is almost over.. Lifetime Tool® & Building Products is coming out with an Architectural Profile Snow Guard to accommodate architectural panels and snap lock roofing systems!

The LT-AP400/500 will be available later this year. This piece has been highly anticipated in the field. Our customers have voiced a need for a larger gauge snow guard that is made in the USA, much like our LT200/LT300. Featuring the same technology, the LT-AP400/500 will also be made of Almag 35 with stainless steel set

If you would like to be added to our list to notify you when they are available, simply reply to this email. We will be sure to contact you with availability.

Roofer Spotlight

Horch Roofing

Peter Wallace of Horch Roofing is one of our longest standing customers. Located in Warren, Maine, Peter and his team use the Ultimate Pipe Flashing® to set themselves apart from their competitors. We recently met up with Peter at the International Roofing Expo in Las Vegas, NV where he recorded a testimonial at our booth. Peter states "We use the Ultimate Pipe Flashing® all the time, on every roof, it's the only way to go!"
