**We have your solution for cast iron pipe, copper pipe, and 3" radon pipe (schedule 30).  
See sizing chart below.**

# EASYSleeve® CAST IRON (1½"-3") & COPPER (1"-4") PIPE?

**CUT!  
DROP!  
GO!**

Section Detail

NOT INTENDED FOR USE AS PIPE EXTENDER

The Ultimate Pipe Flashing® is pipe size specific for PVC, ABS, and some galvanized iron pipe. For copper and cast iron you must use the Lifetime Tool® EasySleeve® or EasyFit™. Formulated from black ASA polymer cap stock for weatherability over PVC for strength and impact. The EasySleeve® utilizes an integral nesting cap that effortlessly addresses both size and condition issues. It's a quick and simple installation that ensures a weather-tight seal.

EASYSLEEVE®					
CAST IRON			COPPER		
CAST IRON Pipe Type	EASY SLEEVE®	ULTIMATE PIPE FLASHING®	COPPER	EASY SLEEVE®	ULTIMATE PIPE FLASHING®
1½"	200	200	1½" & 1½"	150	150
2"	300	300	2"	200	200
3"	400	400	3"	300	300
			4"	400	400

Note: 2" EasySleeve® has both a cap for cast iron on one end & a cap for copper on the other. Choose correct cap & cut to length.  
Note: Use same number flashing as sleeve

## EASYFit™

### 3" or 4" CAST IRON TOTAL ABOVE ROOF PIPE REPLACEMENT

CAP IS STRUCTURAL NO GLUE CAP

### 3" or 4" CAST IRON?

**INSTALL A NEW PIPE IN LESS THAN 10 MINUTES**

Cast iron's inherently irregular surface along with corrosion and residual repairs often make it very difficult to properly seal. The Lifetime Tool® EasyFit™ is both incredibly quick and extremely cost effective. Our patented technology includes an 18" formulated Solarkote® (PMMA) polymer cap stock for unequalled weatherability bonded to PVC for strength and impact and a thick-walled coupling. The three flexible seal rings provide stability and prevent the downdraft of sewer gases. The tap in no-glue compression cap provides superior crush resistance against heavy snow loads. Finish the system installation with the Ultimate Pipe Flashing®

- Use a reciprocating saw with a specialty cast iron cutting blade (available from your local building materials supplier)
- Oil blade frequently while cutting - Low RPM (go slowly)
- See video on website

**FLASHING NIGHTMARE... GONE IN A BLINK.**

### EASYFIT™

CAST IRON PIPE	EASYFIT™	ULTIMATE PIPE FLASHING®
3"	300	300
4"	400	400

**For 3" radon pipe (schedule 30) you must use this adapter for the UPF**

### 30/40 ADAPTER

Easily retrofits Sch. 30 (Radon) to Sch. 40 PVC

#### Instructions:

1. Cut the existing Sch. 30 pipe in the front, no more than 3" above the roof deck.
2. Apply PVC solvent cement (per manufacturer directions)
3. Push the 30/40 Adapter firmly over the existing pipe until seated. Cut to desired length.
4. Install the Ultimate Pipe Flashing®.

## **Roofer Spotlight**

---

We want to thank Taylor Ammons the owner of [Paragon Roofing](#) located in Nashville, TN for sharing this photo showing the recent install of our **Ultimate**

**Pipe Flashing®.** We always appreciate your feedback, thank you again Taylor for your support.

*"I was introduced to the Lifetime Tool about 2 or 3 years ago. As a roofing company owner in Nashville, one of the most common leaks I am called out to address is a failing pipe flashing. In our market, these generic pipe flashing are typically lasting only 10-12 years before they begin to crack and fail. With contractors installing roofing systems that are supposed to last 20-30-40 even 50 years, we are doing our customers a MASSIVE disservice by not offering the Lifetime Tool products on every single project we do. They are an amazing product that is even easier to sell. They sell themselves!"*

Nothing shows recognition and support, more than a picture from a roofing contractor showing an install using our premium roofing components. To learn more about [Paragon Roofing](#), click on the link below.
