# EASYFit™

**FOR 3" AND 4" CAST IRON PIPE**  
INSTALL A NEW PIPE IN LESS THAN 10 MINUTES\*

## INSTALLATION INSTRUCTIONS

1. Cut cast iron pipe flush with the frontal roof decking or sheathing.
2. Use a reciprocating saw with a specialty cast iron cutting blade (available from your local building material supplier).

3. Oil blade frequently while cutting at low RPM (go slowly).
4. Cut EASYFit™ to desired length.
5. Apply a fat bead of urethane caulk for added seal and/or uneven cuts. Press EASYFit™ into cast iron pipe.
6. Insert no glue compression cap until seated. Tap if necessary.
