ULTIMATE PIPE FLASHING[®] SILICONE BOOT COMPRESSION MOLD VIDEO

Cheap pipe flashings are both commonly available and more often than not, used on almost all new and replacement roofs. Quality pipe flashings are not the standard, and that is why pipe flashings are the number one roof leak!

Contractors, roofing professionals, architects and knowledgeable homeowners have seen numerous failures where bad design and poor-quality materials come together. Many have found from experience that the elastomers commonly used in these pipe flashings are doomed to failure.

[The Ultimate Pipe Flashing[®]](#) is made from silicone, just like sand, it's made from silica and is 100% stable in the sun.

**“Silicone is virtually unaffected by weather – rain,
snow, humidity, ozone or the sun's damaging ultraviolet (UV) rays”**

*We help you
invent the future.™*
