

**LIFETIME TOOL
& BUILDING
PRODUCTS LLC**
LIFETIME ROOF SYSTEM COMPONENTS

LIFE OF THE ROOF WARRANTY

Lifetime Tool® & Building Products, LLC, herein referred to as Lifetime Tool®, warrants all of its products - including The Ultimate Pipe Flashing®, The Ultimate Bath-Dryer Vent, EASYSleeve®, EASYFit™, SquareLock™ snow guard, and the LT-AP snow guard - beginning at the time of installation of the new roof covering (shingle, slate, tile, etc.) for the life of the roof, or in the case of retrofit, for the life of the original roof, against any manufacturing or material defects, subject to the terms, conditions, and limitations below.

Lifetime Tool® fully warrants its products for performance and weathertight integrity. Lifetime Tool® uses only factory-applied, 70% PVDF fluoropolymer paint systems. These architectural paint systems are considered the industry standard and have historically been known as Kynar® paint systems. However, Lifetime Tool® does not warrant factory-applied paints. Furthermore, Lifetime Tool® does not warrant coatings applied in the field over factory-applied finishes.

Any claims involving paint condition will be reviewed on a case-by-case basis at the sole discretion of Lifetime Tool®. If a Lifetime Tool® product is believed to be defective, the purchaser must notify Lifetime Tool® in writing, by email, or via fax, and describe the nature of the complaint. To receive an RMA, the purchaser must provide the place of purchase, date of installation, and the installer's contact information. Photograph(s) are helpful and may expedite the process.

The purchaser shall return the part(s) to Lifetime Tool®, where it will be determined, at the sole discretion of Lifetime Tool®, if the part(s) are indeed defective.

The purchaser may choose to prepay for the replacement parts plus shipping and handling, thus expediting the process, or choose to wait until Lifetime Tool® receives and examines the parts and determines if there is a valid warranty claim. If it is determined to be a failure of either manufacturing or materials, Lifetime Tool® shall cover all costs of its replacement parts (parts manufactured by Lifetime Tool®) and reasonable shipping expenses.

The removal of the defective part and associated costs of labor and materials are the sole responsibility of the purchaser, as well as any related damages.

Improper installation of Lifetime Tool® products may include, but is not limited to:

- Failure to adhere to the size-specific requirements of its flashing components.
- Any alterations to the products whatsoever.
- Use of the products on non-intended pipes or materials.
- Nailing of the plate outside the provided nailing slots.
- Use of any caulks or sealants on the silicone boot.
- Removal of the compression ring that comes installed on the boot neck.
- Use of any acidic or caustic chemicals that could damage the products or their coatings.

For correct installation, see our website for detailed videos at LifetimeTool.com.

Lifetime Tool® and its representatives reserve the right to inspect any installation of suspected failed products and shall arrange for an immediate inspection with the property owner.

No other express or implied warranty has been made on behalf of Lifetime Tool® with respect to any of its products, nor shall any of its representatives or sales agents have the authority to make any promises or warranties other than what is stated in this document.

Lifetime Tool® shall not be responsible for any consequential or incidental damages, loss of use, damage to personal or real property, or inconvenience resulting from improper installation or use.
