## OCTOBER 2025 NEWSLETTER

### Employee Spotlight

Meet **Mike Nicholson**, our Territory Sales Manager for **Tennessee and North Georgia**! Mike has been part of the Lifetime Tool<sup>®</sup> team for 18 months, bringing over 20 years of experience in the roofing industry.

Mike's favorite part of the job is connecting with people, something that shines through in every conversation he has. Outside of work, he's a self-proclaimed movie buff who enjoys spending time with his son and family, playing golf, traveling, listening to music, and discovering new places to eat.

Originally from Frederick, MD, Mike now resides outside of Nashville, TN. We're grateful to have his expertise, energy, and passion on our team!

### Distributor Spotlight

Check out this wall display of the **Ultimate Pipe Flashing<sup>®</sup>** and accessories in [Convoy Supply's](#) Portland, OR showroom.

Salesman Andy Kaske shared that the **Ultimate Pipe Flashing<sup>®</sup>** has quickly become his top-selling pipe flashing— even surpassing traditional lead flashings that once dominated the market.

A big thanks to Andy and the Convoy team for offering our Lifetime Tool<sup>®</sup> products for over 12 years!

## Product Spotlight: Snow Guards

Did you know that Lifetime Tool® makes snow guards? Designed by the founder of Real Tool® Snow Guards, unlike others on the market our snow guards are **100% American made**. Manufactured from a certified aluminum-magnesium alloy (Almag 35), they have **superior corrosion resistance** compared to regular aluminum guards. Almag 35 is used extensively in quality marine hardware and coastal accessories to handle the most aggressive environments!

---

### SquareLock™ LT 200 / LT 300

***Go ahead and crank it — you're not going to break it!***

Oval point set screws help protect from cookie cutting or damaging the seam when tightened. And patented angled set screws help prevent panel damage from the use of cordless impacts and/or other tools during installation.

The SquareLock™ snow guard has been developed and manufactured to handle concentrated loads so tremendous that in testing, the panels themselves crushed without dislodging or damaging the SquareLock™ snow guard itself. It can easily withstand more than 4,150 lbs. of force!\*

The SquareLock™ is available in two slot sizes (.200" and .300") to accommodate conventional double lock standing seam panels.

Available in mill finish or 10 factory applied Kynar® colors.

\*Independent testing performed by Farabaugh Engineering and Testing, Inc.

---

## Lifetime Tool® AP 400 / AP 500

The LT-AP snow guard is designed to help prevent the risk of snow slides from sloped metal roof structures on architectural standing seams up to 1/2" thick and a minimum of 1 3/4" tall.

Two set screws are provided for each of the two seam attachment locations, allowing the installer flexibility in mounting to various seam geometries. One set screw has a concave tip, while the other has a convex tip - allowing the seam metal to be formed between these tips without cutting when torque is applied for a permanent attachment to the seam.

Available in mill finish (stock) or call for special order Kynar® colors.
